

## TECHNOLOGY

Naman Howell understands that in today's world technology has taken a major role in everyday life, and law firms are no different. The firm has prioritized its technological infrastructure to help increase efficiency, improve performance, and better protect our client's sensitive data.

Our cloud-first approach to technology puts us in step, and in some ways ahead of many of the "big law" firms to create even more value for our clients. Naman Howell team members are afforded access to state-of-the-art technology that allows for prompt and secure communications internally and externally, immediate access to billions of pages of secured documents on any of their devices 24-hours a day, and full remote capabilities to meet our client's needs no matter where they may be located at the moment.

The firm's investment and commitment to technology reflects our understanding that in order to provide our clients with the greatest value we must never stop moving forward and innovating. We remain committed to working towards providing our clients with the most cost-effective and robust technological solutions within the legal market today.

The firm elects to work closely with many technology vendors who provide for the following:

- ISO 27001 Certification
- ISO 27017 Certification
- ISO 27018 Certification
- ISO 27701 Certification
- GDPR Certification
- Type 2 SOC 2 Protection
- SOC 2 Plus Certification
- FIPS 140-2 Level 3 Certification
- SEC/FINRA Certification
- HIPAA / PHI Compliance
- SIG LITE and SIG CORE Completion
- HECVAT Completion
- BCDR Plan and Infrastructure

If you have questions about our firm's technology we encourage you to reach out directly to our Director of Information Technology as listed below.
